BUSINESS, OPERATIONS & TECHNOLOGY TRANSFORMATION

On-time, on-budget projects that achieve your business and technical goals

ATTAC Consulting Group supports project management and the full scope of implementation roles and activities. We have significant expertise across transaction and ancillary platforms, conversions, migrations, interfaces, coexistence and runout approaches, and insourcing and outsourcing solutions.

We guide implementations of all sizes and scopes across administrative, clinical, portals, data/reporting and integration solutions.

Operations Excellence, Business Transformation and Technology

We use a tactical approach to find root causes, apply operational fixes, and define/implement solutions to drive operational excellence. We help evaluate and solve operational challenges across all functional areas.

There is no universal method to achieve success in business transformation and technology enablement. When you're launching a new line of business, insourcing or outsourcing certain functions, or selecting and implementing new solutions, we deliver the program/project management expertise and end-to-end technology implementation experience to help achieve your business objectives.

WHY WORK WITH ATTAC CONSULTING GROUP?

- ⊘ Our depth and breadth of expertise across platforms and products
- ⊘ Higher likelihood of achieving your goals with added expertise across broad subject matter areas
- ⊘ Ability to offer the right options for your problem based upon our real-world experience
- ⊘ Allow your staff to continue their core functions without complete disruption to your organization

Learn more about how ATTAC can help your plan ensure a business-centric approach to technology and implementation initiatives.

Common Implementation Challenges

- ⊘ Resource availability and competency required in program and project management
- ⊘ Appropriate risk identification and mitigation
- ⊘ Incorporating new programs, products or requirements into an existing solution or technology environment

What We Deliver

- ⊘ Flexibility to accommodate your program and project management toolkit, use the ATTAC-created toolkit, or combine approaches
- ⊘ Enhanced likelihood for on-time, on-budget completion given our experience with implementations and risk mitigation
- ⊘ Clearly defined approach for go-live and transition to ongoing operations based on ATTAC's real-world experience
- ⊘ Transition to steady-state support during implementation and immediately following go-live
- ⊘ Identification and monitoring of KPIs during implementation and after go-live
